

# The Assent Sustainability Platform for Suppliers

Streamline Data Management,  
Get Your Time Back  
& Improve Customer Trust

Managing and sharing product compliance and sustainability data with customers can be time-consuming and costly in complex global supply chains. The Assent Sustainability Platform is purpose-built to help manufacturers and distributors like you seamlessly collaborate with customers and streamline the data management and sharing workflow in one simplified, centralized platform.

The Assent Sustainability Platform is a secure, centralized solution for uploading, storing, and sharing declarations with all your customers. It streamlines data exchange within one integrated platform and eliminates the need for spreadsheets and manual

*In the last year alone, I've probably seen those requests double, if not triple. And customers are becoming more aware of the regulations... So we are seeing a lot more requests, a lot more data in and out of the systems.*

**—Liz Smith, Product Regulatory Compliance Manager at Lippert**

## Meet the Request Manager Solution

With data requests coming from every direction, responding to all your customers can feel near impossible. Even with the best intentions, manual processes and human error can cause priority client requests to slip through the cracks, leading to inconsistencies and poor data quality.

Assent's new Request Manager solution is here to help with AI tools to manage and respond to all your requests — including those that come from outside the Assent system — in one convenient location. With the ability to create dedicated customer spaces and pull from existing data in the Assent network, Request Manager makes compliance easy.

processes. Suppliers can quickly communicate product and company data across the Assent Sustainability Network, bypassing the need to respond to redundant data requests from each and every customer. It also includes cutting-edge tools, simplified workflows, and dedicated support from Assent's team of experts to help you meet program goals. The Assent Sustainability Platform significantly reduces supplier workload, putting the focus back on productivity and profitability.

#### Proactively Share Data & Declarations

- ▶ Registration, Evaluation, Authorisation, and Restriction of Chemicals (REACH) Regulation
- ▶ Restriction of Hazardous Substances (RoHS) Directive
- ▶ California Proposition 65
- ▶ Toxic Substances Control Act (TSCA)
- ▶ Per- and polyfluoroalkyl substances (PFAS)

## Connect to the Assent Sustainability Network

The Assent Sustainability Network is the world's largest supply chain data network built for manufacturers and distributors, providing access to an extensive range of product compliance and sustainability information.

Join the network today to get faster sharing for compliance and sustainability data, stronger customer relationships, and improved trust and transparency.

## The Assent Sustainability Platform Is a **Game-Changer**

### Improve Customer Relationships & Gain a Competitive Advantage

Give your customers confidence that your products are compliant, safe, and sustainable — and save them time — by making it easy to find declarations. Customer data requests are rising rapidly across the manufacturing industry, and having regulatory information ready in advance is key to becoming a preferred supplier.

*At least 60% of our revenue hinges on having rapid access to compliance data. If you can't get buyers that data on demand, they're walking away and finding someone else who can.*

**—Compliance/EH&S Specialist at Prestolite Electric Incorporated**

## Get Data to the Right People

Assent's Network Contacts feature ensures that data and requests are shared with the right person within a supplier's organization. No more guessing or reaching out to an unmonitored inbox.

## An Intuitive, Simple Solution

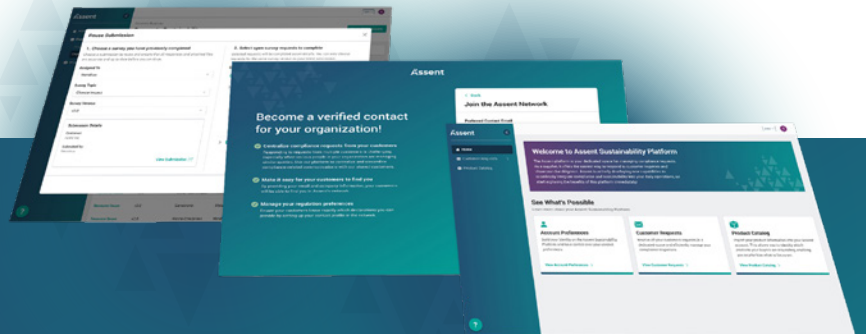

The Assent Sustainability Platform reduces survey fatigue and improves engagement by making it easier to manage compliance data and upload declarations. Access the platform and receive technical support in a number of languages. Say goodbye to complex custom surveys, unclear questions, and unmanageable spreadsheets.

*The changes to the system are going to allow suppliers to control their own information, so the customers... think it will greatly reduce supplier fatigue.*

—Liz Smith, Product Regulatory Compliance Manager at Lippert

## Little Effort, Big Productivity Gains

Respond to a request just once and share that info across Assent's entire customer network. No more duplicate work — just a streamlined process that saves time and eliminates inefficiency. Claim time back from data management tasks, reducing overall compliance program costs without sacrificing customer satisfaction.

## Get Started Today

Speak with an Assent supply chain sustainability expert to find out how to start using the Assent Sustainability Platform. Connect with the world's largest network of manufacturers and distributors achieving deeper sustainability and proactive compliance.
